INTRODUCTION

Index Contents

This index describes ten federal and Illinois State financial assistance programs which are of potential use for the training or equipping of paramedics. Included for each program is its funding status, the administering federal agency, applicant eligibility, program information and federal or State authorizing legislation. In addition, the index indicates sources from which additional information and application materials for each program can be obtained.

Of the ten identified programs, four have rather general eligibility requirements--i.e., States, units of local government, public or non-profit private agencies, organizations and institutions are eligible to submit applications--while six variously restrict grant applicants to local governments, hospitals or educational institutions. Nine of the identified grant programs address themselves to the training of paramedics while but one program can be used to obtain paramedic equipment.

It is important to realize that the word "paramedic"--in common usage, the title applied to a single, specific group of personnel that renders medical services in emergency situations only--is actually a general term which might refer to any of a range of personnel who provide emergency medical service. In practice, the title carried by such personnel varies both in relation to their level of training (and thus, implicitly, to the type of service they perform) and to the organization referring to such personnel. It should be noted that individual funding programs described in this index will not support all types of emergency medical services.

Program Funding Available

The funding situation for programs which can be used to support paramedic operations is a dynamic one. Of the ten programs listed in this index, five are presently funded and available for use. The five remaining programs have been funded in the past and there is a strong possibility they will receive funding in the future; they are included in this index for that reason.

Non-Grant Opportunities for Paramedic Training

In addition to the funding programs described in the body of this index, various educational institutions within Illinois conduct training programs for paramedics.

EMT-A training programs. Twenty-two community colleges, hospitals, colleges and universities throughout the State have received grants from the Illinois Department of Transportation (IDOT) to conduct Emergency Medical Technician-Ambulance (EMT-A) training programs. Trainees in these programs, who must hold the Red Cross Advanced First Aid Certificate for admission,

receive 81 hours of instruction, for which they may receive college credit. Trainees who elect to take the course without college credit may do so without tuition charge. "Active providers of emergency medical services" are given priority for admission into the programs. Following the completion of the course, trainees may take an examination for EMT-A certification by the Illinois Department of Public Health.

In addition to the twenty-two IDOT funded training programs, 49 other facilities in Illinois offer EMT-A training programs. In each case, tuition fees are charged for trainees. Not all of the 49 facilities offer certification tests at the conclusion of the training course. However, trainees may take the certification exam independently at times and locations specified by the Illinois Department of Public Health. The listing of all EMT-A training sites is provided in Appendix A.

EMT-A II training programs. Training intended to lead to certification as an Emergency Medical Technician-Ambulance II (EMT-A II) is provided at thirteen training centers throughout Illinois. These programs are open only to persons already certified as EMT-A's. Tuition charges are assessed for the training. Although the content of the training varies somewhat between individual centers, in each case it meets or exceeds the minimum 120 hour curriculum developed by the Illinois Department of Public Health. Following completion of the training course, trainees who offer proof that they will be a part of an IDPH-approved mobile intensive care system are eligible to take an IDPH examination leading to certification as an EMT-A II. The thirteen approved EMT-A II training sites and five new sites projected for 1976 are shown in Appendix B.

For Further Information

As paramedic funding programs are in a state of flux, this index listing might not be an all-inclusive one at any particular point in time. Additional up-to-date information on paramedic programs may be obtained by contacting any of the general information sources listed below:

Division of Emergency Medical	Bureau of Health Manpower
Services and Highway Safety	Public Health Service
Illinois Department of Public Health	U.S. Department of Health,
535 West Jefferson	Education, and Welfare
Springfield, IL 62701	300 S. Wacker Drive
217/782-6547	Chicago, IL 60606

Division of Associated Health Professions
 Bureau of Health Manpower
 Health Resources Administration
 U.S. Department of Health, Education, and Welfare
 Building 31, Room 3B-29
 9000 Rockville Pike
 Bethesda, MD 20014

Information about most programs listed in this index can also be obtained by looking up the full program description in either of two volumes--the U.S. Office of Management and Budget's Catalog of Federal Domestic Assistance or the Guide to Illinois State Services prepared by the Illinois Department of Local Government Affairs.

Each program listed in this index is identified by either a Catalog or a Guide number. The Catalog is published twice a year and can be obtained from most public libraries or from the U.S. Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. The Guide is updated on an annual basis and can be obtained from the Illinois State Library or from the Illinois Department of Local Government Affairs, Office of Research and Planning, 303 East Monroe, Springfield, IL 62706.

Information about most programs listed in this index can also be obtained by looking on the full program description in either of two volumes--the Office of Management and Budget's Catalog of Federal Domestic Assistance or the Guide to Illinois State Services prepared by the Illinois Department of Local Government Affairs.

Each program listed in this index is identified by either a listing or a guide number. The Catalog of Federal Domestic Assistance is published twice a year and can be obtained from most public libraries or from the U.S. Department of Commerce, Government Printing Office, Washington, D.C. 20540. The Guide is updated as it needs be and can be obtained from the Illinois State Library or from the Illinois Department of Local Government Affairs, Office of Research and Planning, 315 East Monroe, Springfield, IL 62761.

PROGRAM DESCRIPTIONS

Program Name: Emergency Medical Technical Training (Program No. 25.17 in the Guide to Illinois State Services)

Funding Status: Limited funds currently available

Administered by: Division of Emergency Medical Services and Highway Safety, Illinois Department of Public Health

Applicant Eligibility: Units of local government

Program Information: The Illinois Department of Public Health, Division of Emergency Medical Services and Highway Safety (IDPH/EMS & HS) has a limited amount of funds available for the purpose of aiding and/or establishing paramedic training. IDPH/EMS & HS also has the expertise to help communities prepare and submit paramedic training or system grant applications to the U.S. Department of Health, Education, and Welfare (HEW).

Attempts to secure funding for a paramedic program or paramedic program component--such as training--should be initiated by contacting the trauma coordinator in the applicable area-wide health planning agency. (A complete list of the thirty-six trauma coordinators throughout the State is provided in Appendix C.) Upon approving a grant application, the area-wide health planning agency will then forward the grant to the respective Comprehensive State Health Planning Agency Health Planning Organization (CSHPAHPO). (A listing of the CSHPAHPO's is contained in Appendix D.) If the CSHPAHPO approves the application, it is then submitted to the IDPH. Difficulties encountered in this process can often be facilitated by contacting the applicable trauma coordinator who also serves as a regional official (these individuals have been noted with asterisks (*) in the Appendix C listing) or the IDPH/EMS & HS Field Operations Director--Mr. Anthony P. Marquez.

Information Contact: Additional information can be obtained from the local trauma coordinator (see Appendix C) or:

Ms. Carol Pranski
Illinois Department of Public
Health
Division of Emergency Medical
Services and Highway Safety
1125 West Harrison Street
Chicago, IL
312/793-3880

Mr. Anthony P. Marquez
Field Operations Director
Illinois Department of Public
Health
Division of Emergency Medical
Services and Highway Safety
535 West Jefferson
Springfield, IL 62701
217/782-6547

Authorizing Legislation: Federal--Highway Safety Act of 1966

Program Name: Illinois Transportation Safety Program (Program No. 28.6 in the Guide to Illinois State Services)

Funding Status: Funds currently available

Administered by: Office of Transportation Safety, Illinois Department of Transportation

Applicant Eligibility: Counties and municipalities

Program Information: Administered by the Safety Projects Section of the Illinois Department of Transportation (IDOT), this program allows units of local government to be reimbursed for 70% of the costs of an ambulance and its equipment. The program also provides reimbursements (at levels to be determined by IDOT) for costs that might be associated with the training of ambulance technicians. The grant application process is initiated through the local trauma coordinator (see Appendix C).

Information Contact:

Springfield, IL 62707
217/782-5853

Authorizing Legislation: State--Illinois Revised Statutes, Chapter 127, Section 49.15; Chapter 95½, Section 17-101

Federal--23 U.S.C. 402, Federal Highway Safety Act

0

Program Name: Allied Health Professions-Special Project Grants (Program No. 13.305 in the Catalog of Federal Domestic Assistance)

Funding Status: Funding for new programs not currently available. Continuation of program funding presently under Congressional consideration.

Administered by: Division of Associated Health Professions, Bureau of Health Resources Development, Health Resources Administration, Public Health Service, U.S. Department of Health, Education, and Welfare

Applicant Eligibility: Public or non-profit private agencies, organizations and institutions

Program Information: Grants are awarded for projects related to the training (or retraining) of allied health personnel. Allied Health Personnel can be defined as individuals with training and responsibilities for (1) supporting, complementing, or supplementing the professional functions of physicians, dentists, and other health professionals in the delivery of health care to patients, or (2) assisting health professionals or environmental personnel in environmental health control activities. Specific program purposes that can be funded include one or any combination of the following:

1. Planning, establishing, demonstrating, or developing new programs, or modifying or expanding existing programs, including interdisciplinary training programs;
2. Developing, demonstrating, or establishing special programs, or adapting existing programs, to teach special groups such as returning veterans with experience in a health field, the economically or culturally deprived, or persons reentering any of the allied health fields;
3. Developing, demonstrating, or evaluating new or improved teaching methods or curriculums;
4. Developing, demonstrating, or establishing interrelationships among institutions which will facilitate the training, retraining, or utilization of allied health manpower;
5. Developing, demonstrating, or evaluating new types of health manpower;
6. Developing, demonstrating, or evaluating techniques for appropriate recognition of previously acquired training or experience; and
7. Developing, demonstrating, or evaluating new or improved means of recruitment, retraining, or retention of allied health manpower.

7
It should be noted that priority is given to programs offering academic credit and awarding an associate (or higher) degree. It is also important to realize that the emphasis under the authorizing legislation is on experimentation in the development of educational programs rather than on basic operating support.

Information Contact:

Ms. Sallie M. Norcott
Special Project Program - D12
Division of Associate Health Professions
Bureau of Health Manpower, Health Resources Administration
U.S. Department of Health, Education, and Welfare
Building 31, Room 3B-29
9000 Rockville Pike
Bethesda, Maryland 20014
301/496-5561

Authorizing Legislation: Federal--Public Health Service Act, Title VII,
Section 792, Public Law 93-45, 42 U.S.C. 295h-1

Program Name: Emergency Medical Services (Program No. 13.284 in the Catalog of Federal Domestic Assistance)

Funding Status: Funding for new programs not currently available. Continuation of program funding is presently under Congressional consideration.

Administered by: Health Services Administration, Public Health Service, U.S. Department of Health, Education, and Welfare

Applicant Eligibility: States, units of general local government, public entities administering compacts or other regional arrangements, public entities and non-profit private entities

Program Information: This program is intended to aid in the establishment (in addition to aiding feasibility studies, expansion and improvement) of Emergency Medical Services Systems (EMSS). An EMSS contains fifteen required components:

1. Manpower
2. Training
3. Communications
4. Transportation
5. Facilities
6. Critical Care Units
7. Public Safety Agencies
8. Consumer Participation
9. Accessibility to Care
10. Transfer of Patients
11. Standard Medical Record-Keeping
12. Public Information and Education
13. Evaluation
14. Disaster Linkage
15. Mutual Aid Agreements

It is possible, however, to receive funding for training without the other fourteen EMSS components. Personnel in the regional DHEW Office (300 S. Wacker Drive, Chicago, Illinois 60606), have informed us that if an applicant:

1. seeks funds from the Allied Health Professions--Special Project Grants program (13.305) for the purpose of training emergency medical personnel;
2. finds that funds are not available (they are not--see Allied Health Professions-Special Projects Grants); and
3. secures a letter stating that funds are not available under the Allied Health Professions-Special Project Grants program and

submits this letter with the request that training funds be provided through the Emergency Medical Services Systems program,

then a grant solely intended to support only the training of emergency medical personnel (rather than for a complete fifteen-part EMSS) will be considered. A letter certifying the unavailability of funds under the Allied Health Professions-Special Project grant can be obtained by contacting:

Mr. Earl Murphy
Bureau of Health Manpower
Public Health Service
U.S. Department of Health, Education, and Welfare
300 S. Wacker Drive - 26th Floor
Chicago, IL 60606
312/353-8703

It should be noted that state governments are given priority in the consideration of applications and the probability of funds remaining after grants to state governments have been considered is questionable.

U.S. Department of Health, Education,	6525 Belcrest Road
and Welfare	West Hyattsville, MD 20782
300 South Wacker Drive	
Chicago, IL 60606	

Authorizing Legislation: Federal--Title XII, Sections 1202, 1203, and 1204 of the Emergency Medical Services Systems Act of 1973

Program Name: Health Manpower Education Initiative Awards (Program No. 13.380 in the Catalog of Federal Domestic Assistance)

Funding Status (Physician's Assistant Program): Funding for new programs not currently available

Administered by: Health Resources Administration, Public Health Service, U.S. Department of Health, Education, and Welfare

Applicant Eligibility: Hospitals and clinics having appropriate education resources, medical schools, health science centers and schools of allied health professions

Program Information: Among the programs supported by this grant are training programs for physician's assistants--i.e., skilled persons "qualified by academic and practical on-the-job training to provide patient services under the supervision and direction of" licensed physicians who are "responsible for the performance of" those assistants. The purpose of the program is to obtain graduates that would assist physicians practicing family medicine, internal medicine, obstetrics, pediatrics or emergency medicine. It should be noted that the program is particularly interested in supporting the training of physician's assistants who would practice in inner-city or rural areas.

The Physician's Assistant Program (PAP) funded four training operations in Region V (Region V includes Illinois, Indiana, Michigan, Ohio, Wisconsin, and Minnesota) in FY 1972. These operations were given continued support in FY 1973 and 1974 and, after the PAP programs authorizing legislation expired on June 30, 1974, received limited support in FY 1975 and 1976 through a continuing resolution. No new operations were funded in FY 1973, 1974, 1975 or 1976 and no expansion of supported operations was funded in FY 1976. An evaluation of the supported operations is currently underway. (The four Region V operations that were supported, in addition to the FY 1974 funding received by each operation and contact persons for each operation, are listed in Appendix F.)

Authorizing Legislation: Federal--Public Health Service Act, Section 774(a)
and (b), as amended by the Comprehensive Health Manpower Training
Act of 1971; Public Law 92-157

Program Name: Education and Training of Health Services Personnel (Program No. 64.003 in the Catalog of Federal Domestic Assistance)

Funding Status: Funds currently available

Administered by: Department of Medicine and Surgery, U.S. Veterans Administration

Applicant Eligibility: Medical, dental, osteopathic and nursing schools, other institutions of higher learning, medical centers, hospitals, and other public or non-profit bodies

Program Information: This program essentially provides resources, such as a patient population, laboratories, clinical teachers, etc., for student clinical training. It should be noted that this is a Veterans Administration program, however, and training is provided only in Veterans Administration (VA) hospitals. In addition to the training resources, a particular hospital might also provide stipends to students during the period of their training at the hospital.

Application for participation in the program first involves communicating the desire to engage in cooperative health service training to a particular VA hospital or clinic or to the VA Central Office. Depending on the type of training involved and the need for funding, the VA Central Office or health facility then determines a cooperative training arrangement with the applying institution and executes a training agreement. The Central Office approves funding and the VA health facility administers the payments. The range of approval/disapproval time is two to four months.

Program Name: Grants to Affiliated Medical Schools-Assistance to Health Manpower Training Institutions (Program No. 64.021 in the Catalog of Federal Domestic Assistance)

Funding Status: Funds currently available for new state medical schools. Funds for health manpower training institutions not currently available.

Administered by: Department of Medicine and Surgery, U.S. Veterans Administration

Applicant Eligibility: Schools of medicine (having at least a two-year course of study leading to the doctor of medicine degree), non-profit educational facilities or institutions which conduct formally organized education or training programs for health professions and other allied health personnel, and organizations or consortia of such institutions that develop, coordinate or expand such education or training on a community-wide basis. Any applicant must be affiliated with a Veterans Administration medical facility, receive supplemental support and have appropriate accreditation.

Program Information: Established for the purpose of improving and expanding the training of professional, allied health and paramedical personnel, this program provides grants for items such as the salaries of professional and supporting staff, fringe benefits, supplies and certain equipment, limited alterations of existing buildings, construction of new teaching facilities (with some restrictions) and other costs necessary to carry out the purposes of the program.

Application deadlines are March 1 and September 1 of each year. The range of approval/disapproval time is 90 to 120 days.

Authorizing Legislation: Federal--Public Law 92-541, October 24, 1974; 86 Stat. 1101; 38 U.S.C. 6; Chapter 82 added; 38 U.S.C. 4101, 4112, 5001, 5012, 5051; Subchapters II, III, IV 5081-5096

Program Name: Schools of Public Health--Grants (Program No. 13.370 in the
Catalog of Federal Domestic Assistance)

Funding Status: Funds not presently available.

Administered by: Health Resources Administration, Public Health Service,
U.S. Department of Health, Education, and Welfare

Applicant Eligibility: Accredited schools of public health

Program Information: This grant program seeks to assist schools of public health in providing comprehensive professional public health training and specialized consultative services and technical assistance in the administration of State and/or local public health programs.

Grants under the program may be used for support of faculty, supporting staff equipment and for other costs associated with the maintenance of a teaching program in public health. Amounts of grants are determined by dividing one-third of the available funds among all the eligible institutions and dividing the remaining two-thirds among the institutions using a formula based on the number of federally-sponsored students enrolled in each institution. The range of approval/disapproval time is approximately one month. The deadline for grant applications is June of each year.

Authorizing Legislation: Federal--Public Health Service Act, Title III,
Section 309(c); Public Law 93-45; 42 U.S.C. 242g

Program Name: Health Services Research and Development-Grants and Contracts
(Program No. 13.226 in the Catalog of Federal Domestic Assistance)

Funding Status: Funds currently available

Administered by: Health Resources Administration; Public Health Service,
U.S. Department of Health, Education, and Welfare

Applicant Eligibility: States, political subdivisions, universities, hospitals, and other public or non-profit private agencies, institutions or organizations are eligible for this grant program. Research project grants may also be awarded to individuals. Profitmaking organizations are not eligible for grants but are eligible for contracts.

Program Information: Health Services Research and Development grants are intended to support research, development, demonstration and evaluation that is designed to improve health services. Projects supported under this program are those that develop and/or evaluate more effective and efficient ways of utilizing manpower, equipment, facilities, and data to improve quality control, organization, management and financing of health services programs in communities, regions, and states. Priority is given to projects that attempt to improve the availability and costs (such as personnel, travel, equipment, supplies, etc.) necessary to carry out an approved project as well as for applicable indirect costs.

New grant applications must be submitted by February 1, June 1, or October 1. The range of approval/disapproval time is 150 to 180 days from the time the application is received by HEW.

Though there are no matching requirements, grantees are required to share some portion of a project's total cost.

Program Name: Allied Health Professions-Special Improvement Program (Program No. 13.377 in the Catalog of Federal Domestic Assistance)

Funding Status: Funding for programs not currently available. Continuation of program funding is presently under Congressional consideration.

Administered by: Division of Allied Health Manpower, Bureau of Health Manpower Education, National Institutes of Health, Public Health Service, U.S. Department of Health, Education, and Welfare

Applicant Eligibility: Junior colleges, colleges and universities that qualify as training centers for the allied health professions

Program Information: Grants are awarded for the provision, maintenance, expansion or improvement of the specialized function which an eligible training center serves, including the following:

1. expansion of the enrollment in allied health educational programs presently offered when the need for allied health workers warrants such expansion;
2. improvement in the quality of the allied health curriculum(s) offered through revision, improved teaching methods and aids, better coordination between academic and clinical portions of the curriculum, etc.;
3. establishment of additional allied health educational and training programs in fields not currently offered at that institution;
4. implementation of special programs which have been developed through other mechanisms to reach special groups, such as returning veterans in a health field, the economically or culturally deprived, or persons reentering any of the allied health fields; and
5. development and implementation of better coordination between programs, both within the institution and among cooperating institutions, for the training of allied health manpower.
